Objective

My objective is to become a powerful asset to a company. To be more valuable to the company than it is to me. To be surrounded by energetic, well-motivated individuals seeking to succeed in their own way. Most importantly I want to enjoy what I do and hopefully through these means I will be able to enjoy life and achieve professional goals as well as personal.

Work history

my work experience in programming and application development expands over 4 years. My experience in IT expands over 6.

MywebWOW!com
